EXECUTIVE SUMMARY

I. INTRODUCTION

The Domiciliary Care for Homeless Veterans (DCHV) program has provided effective time-limited residential rehabilitation and treatment to homeless veterans with multiple medical and psychiatry comorbidities. Over the sixteen years from the program's inception in 1987 to the end of FY 2004, almost 66,000 episodes of treatment have been provided. Currently there are 34 sites with a total of 1,833 operational beds, both unchanged from FY 2002.

This report offers information for program managers at the national, VISN, and local medical center levels.

II. THE CLINICAL OPERATION

During FY 2004, 5,250 veterans completed an episode of DCHV treatment, slightly higher than the 5,160 discharges reported in FY 2003. Monitoring data indicate that 92% veterans admitted to the program were diagnosed with a substance abuse problem, 49% had a severe mental illness and 44% were diagnosed with both a psychiatric disorder and a substance use disorder. In addition, in the last several years, there have been gradual increases in the proportion of veterans with chronic medical conditions such as hypertension, COPD, diabetes, and gastrointestinal and liver diseases. The rise in medical problems may be related to an increase in the average age of the DCHV population over the same time period, from a low of 42 years in FY 1992 to a high of 48 years in FY 2004.

The average length of stay in FY 2004 was 115 days, which has been gradually increasing since FY 1999 (102 days). At discharge, 38% of veterans were placed in independent housing, and 23% were discharged to the residence of a family member or friend. Only 6% were homeless at discharge. More than thirty-six percent of veterans discharged had secured part-time or full-time competitive employment and an additional 16% had arrangements to participate in a VA work therapy program or other non-VA vocational rehabilitation program.

Twenty critical monitors were used to evaluate sites, VISNs, and to statistically identify performance outliers. The average performance across all DCHV sites is used as the norm for evaluating the performance of each individual site (or VISN) on most critical monitors except outcomes. For outcome monitors, each site is compared to the site (or VISN) with the median performance, after statistically adjusting for baseline characteristics that are significantly related to each outcome. In total, there were 116 out of a possible 680 outliers. Five sites had no outliers. Ten sites had five or more outliers. On the VISN level, there were 60 out of a possible 380 outliers. Four VISNs had no outliers.

III. DCHV OUTREACH

During FY 2004, 681 veterans were contacted as a result of outreach, 1,882 fewer

veterans than in FY 1997. Many DCHV programs work collaboratively with other VA programs that provide outreach and services to homeless veterans, decreasing the need for DCHV programs to conduct their own outreach. In FY1997, 18 sites provided outreach, compared to 7 sites in FY 2004. Three of the seven sites performed 86% percent of all outreach contacts. Of the 1,910 homeless veterans contacted as a result of outreach during fiscal years 2002 and 2003, 418 (28%) entered the DCHV program.

IV. SUMMARY

In conclusion, the DCHV Program has a substantial record of providing effective clinical assistance to homeless veterans with multiple medical and psychiatric comorbidities. In the years to come, it is expected that the DCHV Program will continue to improve and strengthen the residential treatment offered to veterans and develop new efforts to meet the changing clinical needs of this deserving veteran population.

ACKNOWLEDGMENTS

The monitoring of the Domiciliary Care for Homeless Veterans Program is accomplished through the work and cooperation of many people. In VHA Headquarters, Jane Tollett PhD, Chief of Domiciliary Care, provided invaluable leadership and support to both the program and its evaluation. We wish her well in her retirement. We also thank Mark Shelhorse, MD and M. Gay Koerber of the Mental Health Strategic Health Care group at VHA Headquarters for their ongoing support and leadership. At NEPEC we would like to thank Bernice Zigler for supporting our work throughout the year with her expertise in data management and computer programming.

We would also like to express our sincere appreciation for the work of the Domiciliary Chiefs, Coordinators, and all their staff. They are a dedicated group of professionals who work tirelessly on behalf of homeless veterans.

CHAPTER I: INTRODUCTION

In the United States, approximately 32.7% of homeless men are veterans (Gamache, Rosenheck and Tessler, 2001). The Department of Veteran Affairs Fiscal Year 2000 End-of-Year Survey of Homeless Veterans reported that 28% (n=4,774) of all patients are homeless at the time of their admission to VA (Seibyl, Sieffert, Medak and Rosenheck, 2001).

Since 1987, the Department of Veterans Affairs (VA) has addressed the problems of homelessness among veterans through the development of specialized programs. With the passage of Public Laws 100-71 and 100-6, VA implemented the Domiciliary Care for Homeless Veterans (DCHV) and the Health Care for Homeless Veterans (HCHV) Program.¹ This report, the sixteenth in a series of progress reports, describes the ongoing operation of the DCHV Program during fiscal year 2004.

The Domiciliary Care for Homeless Veterans Program

The mission and goals of the DCHV Program are to: 1) reduce homelessness; 2) improve the health status, employment performance and access to basic social and material resources among veterans, and 3) reduce overall reliance on costly VA inpatient services. The DCHV Program is a time-limited residential rehabilitation and treatment program providing medical and psychiatric services including substance abuse treatment and sobriety maintenance. Programs also provide social and vocational rehabilitation, including work-for-pay programs at most sites (e.g., VA's Compensated Work Therapy or Incentive Work Therapy Programs). Post-discharge community support and aftercare is also available. Seven sites also provide outreach to identify under-served veterans among homeless persons encountered in soup kitchens, shelters and other community locations.

The DCHV Program has just completed its sixteenth year of clinical operation. From the program's inception in 1987 to the end of FY 2004, there have been over 65,790 episodes of care. The DCHV Program currently operates at 34 sites with a total of 1,833 operational beds (Table 1b)², with between 20 to 178 beds per site.

Organization of the Veterans Health Administration

The Veterans Health Administration (VHA) is organized into 21 semiautonomous Veterans Integrated Service Networks (VISNs)³. Each VISN is charged with developing cost-effective health care programs that are responsive both to the national mission of the VA and to local circumstances and trends in health care delivery. Although autonomous, the VISNs are also accountable through centralized monitoring of performance and

¹ Formerly known as the Homeless Chronically Mentally Ill (HCMI) Veterans Program.

² The Portland VA medical center facility closed its 40-bed DCHV program in November 2001

³ During FY 2002 VISNs 13 and 14 were combined to form VISN 23.

health care outcomes. This report provides information for program managers at the national level, VISN level, as well as the local medical center level.

Evaluation and Monitoring Methods

Since its inception, the work of the DCHV Program has been evaluated and monitored by VA's Northeast Program Evaluation Center (NEPEC) in West Haven, Connecticut. The goals of the evaluation are to provide an ongoing description of the status and needs of homeless veterans, to assure program accountability, and to identify ways to refine or change the clinical program, nationally and at specific sites. Key findings from previous progress reports have concluded⁴

- The program reaches its intended target population
- Veterans treated in the program show improvements in housing, income, substance abuse, psychiatric symptoms, health care utilization, social functioning and employment.
- The homeless veteran population admitted to the program has changed in recent years. Veterans are older, more ill (substance abuse problems, serious mental illnesses and chronic medical conditions), a greater proportion is an ethnic minority, and a greater proportion has recently become homeless.

Tracking the ongoing performance of the DCHV Program is accomplished through a data monitoring system that examines the characteristics of veterans admitted to the program and their clinical outcomes at the time of discharge (see Appendix A – the Homeless Veterans Data Sheet); and; 2) efforts to contact veterans in the community through special domiciliary-based outreach efforts (see Appendix B - the Outreach Form).

Data Used to Assess DCHV Program Performance

The performance of each DCHV program is assessed with two types of measures that reflect essential aspects of program operation.

Descriptive measures are those data that provide basic information on the characteristics of the veterans being served by the program (e.g. age, marital status, service era, etc).

Critical monitor measures evaluate the VA's progress towards meeting the goals and objectives of the DCHV Program as set forth by P.L. 100-70 (the authorizing legislation) as well as by programmatic guidelines developed in discussions with DCHV sites and VHA Headquarters. Critical monitors are used to identify sites whose performance is substantially different from other sites.

A subcategory of critical monitor measures is the ***special emphasis program performance measures***. These special emphasis critical monitor measures have been selected by the Under Secretary for Health to evaluate the performance of VA's Homeless Veterans Treatment and Assistance Programs (see VHA Directive 96-051), one of twelve Special Emphasis Program (SEP) categories.

Selection of Critical Monitors

There are twenty critical monitors, organized into four categories:

- ***Program structure*** (e.g., annual turnover rate)
- ***Veteran characteristics*** (e.g., the extent to which the DCHV program serves the intended target population of homeless ill veterans)
- ***Program participation*** (e.g., length of stay and type of discharge)
- ***Outcomes*** (e.g., housing and employment arrangements at the time of discharge from the program, percent improved with alcohol, drug, mental health and medical problems).

Outlined below are five objectives that reflect the goals of the DCHV Program, and the corresponding critical monitors. **Critical monitors bolded below are special emphasis program performance measures as identified by VHA Headquarters.**

Objective 1:

The DCHV Program was established to serve homeless veterans, or veterans at risk for homelessness who have a clinical need for VA-based biopsychosocial residential rehabilitation services.

The critical monitors selected to assess this objective are:

- Veteran has no residence prior to admission
- Veteran has a psychiatric disorder, substance abuse problem or medical illness

Objective 2:

An emphasis should be placed on providing treatment to literally homeless veterans and admissions to the program should be available, on only a limited basis, to veterans who are at risk for homelessness.

The critical monitor selected to assess this objective is:

- Veteran is literally homeless

Objective 3:

Preference for admissions should be given to underserved homeless veterans living in the community (e.g., shelters).

The critical monitors selected to assess this objective are:

- Veteran's usual residence prior to admission is a shelter or veteran has no residence and is living outdoors or in an abandoned building
- Veteran's usual residence prior to admission is not an institution, primarily a VA inpatient program
- Veteran is not referred to the program by a VA inpatient or outpatient program

Objective 4:

The program is to provide time-limited residential treatment.

The critical monitors selected to assess this objective are:

- **Annual turnover rate** ⁵
- Average length of stay
- **Percent of successful program completions**
- Disciplinary discharges
- Premature program departures

Objective 5:

The DCHV Program's primary mission is to reduce homelessness, improve the health status, employment performance and access to basic social and material resources among homeless veterans, and reduce further use of VA inpatient and domiciliary care services.

Critical monitors selected to assess this objective are:

- **Clinical improvement of veterans with alcohol problems**
- **Clinical improvement of veterans with drug problems**
- Clinical improvement of veterans with non-substance abuse psychiatric problems
- Clinical improvement of veterans with medical problems
- **Percent of veterans discharged to an apartment, room or house**
- No housing arrangements after discharge
- **Percent of veterans discharged with arrangements for full- or part-time employment**
- Unemployed after discharge

Determining Outliers on Critical Monitors

Generally, the average of all DCHV sites (or VISNs) is used as the norm for evaluating the performance of each individual site. Those sites that are one standard deviation above or below the mean in the *undesirable* direction are considered "outliers."

Outliers for outcome measures are derived differently. Outcome measures are first risk adjusted for baseline characteristics, and the median site is identified based on the risk-adjusted outcomes. Sites who are statistically different from the median site in the *undesirable* direction after adjusting for baseline measures are considered outliers. Selection of the baseline characteristics differs depending on the outcome measure, but

⁵ Annual turnover rate is determined by dividing the total number of discharges in the DCHV Program by the number of DCHV operating beds. Average length of stay and occupancy rates will influence a site's value for annual turnover rate.

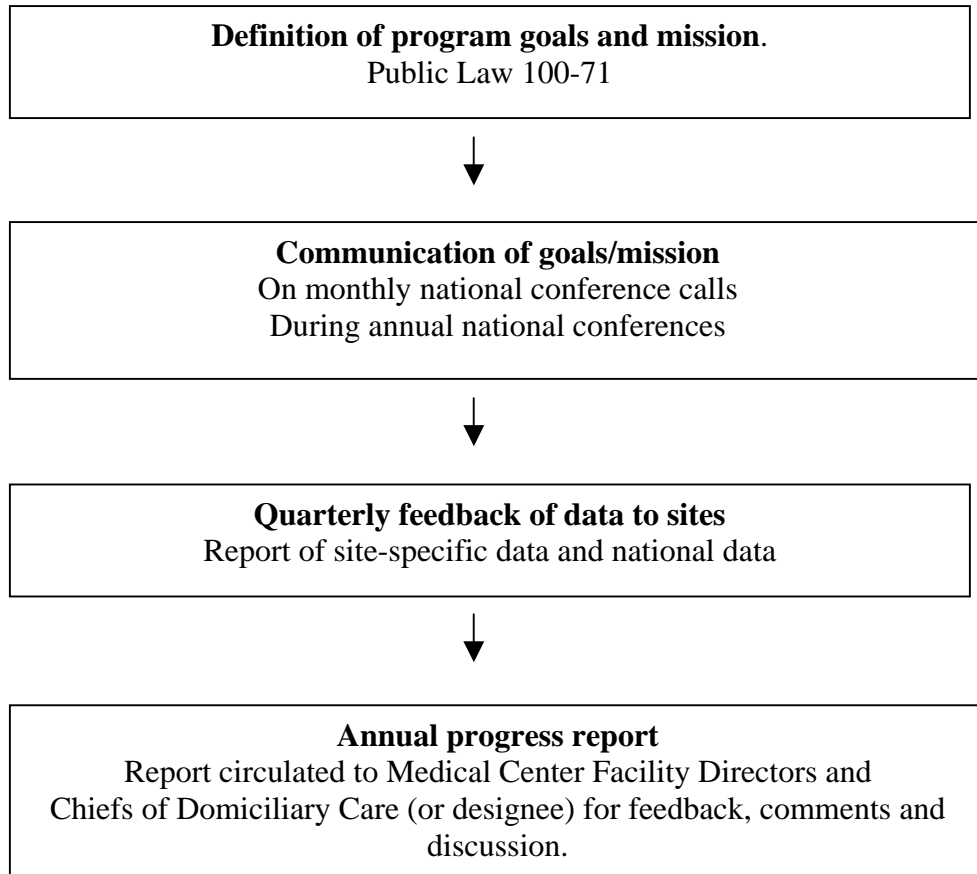

they include age, marital status, homelessness, receipt of disability benefits, income, employment history, previous utilization of health care services, clinical psychiatric diagnoses, number of medical problems and the veteran's perception of his/her health problems.

The identification of a site as an outlier on a critical monitor is intended to inform the program director, medical center leadership, network leadership and VHA Headquarters that the site is divergent from other sites with respect to that critical monitor. Each site is asked to carefully consider the measures on which they are outliers. In some instances this information is used to take corrective action in order to align the site more closely with the mission and goals of the program. In other instances sites have been identified as outliers because of legitimate idiosyncrasies in the operation of the program that do not warrant corrective action. **It must be emphasized that these monitors should not be considered by themselves to be indicators of the quality of care delivered at particular sites.** They can be used only to identify statistical outliers, the importance of which must be determined by follow-up discussions with, or visits to, the sites.

Overview of the Monitoring Process

Figure 1 provides a summary overview of the monitoring process. It begins with the definition of DCHV Program goals and the program's mission that are communicated to sites through monthly national conference calls and annual national conferences. Forms completed on each veteran discharged from the program, as well as on each veteran assessed as a result of special domiciliary-based outreach efforts, are submitted monthly to NEPEC by program sites. These data are aggregated and reported back to sites on a quarterly basis. Each year an annual progress report is written. This report is circulated to the field for feedback, comments and discussion.

Figure 1. DCHV Monitoring Process.

Organization of This Report

This report is divided into two sections. The first section contains four chapters, the first of which is this introduction. The second chapter provides highlights from the monitoring data from FY 2004, as well as changes in the program over time. Chapter III reviews monitoring data collected on veterans contacted as a result of domiciliary-based community outreach efforts. The last chapter summarizes the evaluation findings to date.

The second section of this report contains three appendices. Appendices A and B are copies of the monitoring data collection forms. Appendix C contains 61 data tables. The tables are organized into 7 groups:

1. Tables 1 – 10 provide an overview of the entire program from fiscal years 1989 through 2004.
2. Tables 11 – 15 present the critical monitors by VISN for FY 2004.
3. Tables 16 – 42 present selected data by site for FY 2004, including critical monitors.
4. Tables 43 and 44 are summary tables indicating all outliers for each critical monitor by site.
5. Tables 45 – 51 present trend data on the critical monitors and special emphasis program performance measures for the last seven fiscal years, FY 1997 through FY2004.
6. Tables 52 – 58 present data on veterans contacted through DCHV outreach.
7. Tables 59 – 61 compare veterans contacted through outreach with veterans completing DCHV treatment.

To assist in navigating this report, a List of Tables has been provided on the first page of Appendix C.

CHAPTER II: THE CLINICAL OPERATION

National Performance

Tables 1 - 10 present summary national data on program structure, veteran characteristics, program participation, and discharge outcomes for fiscal years 1989 - 2004. Highlighted below are key findings:

Program Structure

- During FY 2004 there were 1,833 operational beds, the same number as the previous fiscal year (Table 1b).⁶
- The number of veterans completing an episode of DCHV treatment slightly increased from FY 2003 to FY 2004, with 5,160 discharges in FY 2003 and 5,250 discharges in FY 2004 (Table 1a).

Veteran Characteristics

- Forty-one percent of referrals were from inpatient units. This percentage has been relatively stable since FY 1998, ranging from a low of 37.1% (FY 2000) to 42.3% (FY 1998). Self-referral remains the second highest means of referral at 23%. The percent referred as a result of community outreach (13.7% in FY 2004) has been decreasing since FY 2001 (18.9%; Table 3).
- During FY 2004 the proportion of African American veterans admitted to the program was 48.4%, 45.8% were White, 4.0% were Hispanic, and 1.8% were of another ethnic origin. FY 2004 is the third consecutive year where African American veterans are the largest ethnic group to receive treatment (Table 3).
- Of veterans admitted during FY 2004, the majority (55.0%) of veterans had served during the post-Vietnam (including Persian Gulf) era, and 42.0% served during the Vietnam Era. This is the third consecutive year in which post-Vietnam service era veterans exceeded those who had served during the Vietnam era (Table 4), prior to which Vietnam service era veterans were the majority.

⁶ Due to budget considerations, the Portland (OR) VA medical center closed their 40-bed DCHV program in November 2001. Although there were plans to reopen the program in FY2003, it remains closed as of this report.

- Prior to their DCHV admission, the majority of veterans (54.0%) had been homeless for 1 – 11 months, 22.5% had been homeless for a year or more, and 19.0% of veterans had been homeless for less than a month (Table 5). Slightly over half of all veterans (52.2%) spent at least one night outdoors or in a shelter in the month prior to their DCHV admission.
- Three-quarters of veterans (76.2%) reported using VA for medical or psychiatric services in the six months prior to their admission and 41.2% reported having had a previous domiciliary admission (Table 6).
- Over half (52.8%) of veterans reported having no income in the 30 days prior to admission to the DCHV program during FY 2004 (Table 7).
- Almost all (91.9%) veterans admitted to the DCHV program in FY 2004 were diagnosed with a substance abuse disorder. Some veterans had both alcohol and drug problems; of all veterans admitted, 79.4% were diagnosed with an alcohol abuse/dependency disorder and 69.9% received a diagnosis of a drug abuse/dependency disorder (Table 8).
- During FY 2004, nearly half of veterans (48.6%) had a diagnosis of a serious mental illness and 44.0% had a diagnosis of both a serious mental illness and a substance use disorder (Table 8).
- The mean age of veterans admitted to the DCHV program has been increasing over time. The mean age in FY 1992 was 41.8 years – in FY 2004 the average age was approximately 48 years (Table 3). There has also been an increase in the proportion of veterans with medical illness such as hypertension (9.7% in FY 1992 vs. 25.5% in FY 2004), COPD (5.4% in FY 1992 vs. 7.5% in FY 2004), diabetes (3.6% in FY 1992 vs. 10.2% in FY 2004), gastrointestinal disease (8.1% in FY 1992 vs. 12.8% in FY 2004) and liver disease (6.1% in FY 1992 vs. 21.4% in FY 2004), which may be related to the increasing age of the DCHV population (Table 8).

Program Participation

- The average length of stay in FY 2004 was 115.1 days. This figure has been gradually increasing since FY 1999, when average length of stay had dropped to 101.6. Prior to FY 1999 lengths of stay had been decreasing from a high of 138.7 days in FY 1995 (Table 9).
- During FY 2004 almost three-quarters of veterans (71.6%) successfully completed the program (Table 9).

Outcomes

- More than one-third (38.1%) of veterans from the DCHV program in FY 2004 went to live in their own apartment, room or house after discharge. An additional 23.4% were discharged to an apartment, room or house of a family member or friend, 4.4% were discharged to an institution, and 2.8% went to another domiciliary program. A small percentage (5.9%) was homeless at discharge, or left the program without indicating their future living arrangements (8.9%; Table 9).
- In the last several years there has been an increase in the proportion of veterans discharged to an HWH/transitional treatment program (9.6% in FY 1997 to 14.9% in FY 2004).
- More than thirty-six percent of veterans had secured part-time or full-time competitive employment at the time of discharge. An additional 15.6% had arrangements to participate in a VA work therapy program (CWT or IT) or non-VA vocational training. These numbers have been generally consistent over the last eight years (Table 9).
- The proportion of veterans showing improvement in the ten clinical areas measured has been rising slowly over the history of the DCHV evaluation. This trend continued in FY 2004, with the proportion of veterans rated as clinically improved ranging from 69.7% (employment) to 92.1% (personal hygiene, Table 10).

VISN Performance

During FY 2004, there were DCHV programs within most VISNs; only VISNs 11 and 19 did not have DCHV programs. Eight VISNs had 1 program, seven VISNs had 2 programs, and four VISNs housed 3 DCHV programs (Table 11).

The number of operating beds per VISN ranged from 24 (VISNs 6) to 228 (VISN 15). The number of veterans discharged per VISN ranged from 39 (VISN 2) to 629 (VISN 10; Table 11).

Nationally, between FY 2003 and FY 2004 there was a 1.7% increase in the total number of discharges. Ten VISNs increased the number of veterans discharged from the DCHV program, ranging from a 2.0% increase (VISN 4) to a high of 116.7% (VISN 2). The remaining nine VISNs reported decreases in discharges from 1.9% (VISN 17) to a 31.3% decrease (VISN 8; Table 2a).

The performance of all VISNs is used as the norm for evaluating the performance of each individual VISN. Those VISNs that are one standard deviation above or below the mean in the *undesirable* direction are considered outliers, or for risk adjusted outcome measures, VISNs that are statistically different from the median VISN in the *undesirable*

direction on outcome measures are considered outliers. A more detailed description of these monitors is in Chapter I of this report.

Tables 11 - 14 report the 20 critical monitor and special emphasis critical monitor measures by VISN for FY 2004. VISNs whose results are considered "outliers" are identified in these tables with two types of shading: a shaded box identifies outliers on critical monitors; however, the columns presenting special emphasis monitors are shaded, and thus un-shaded (white) boxes identify these outliers.

Table 15 provides a summary of the outlier status of each VISN. There were a total of 60 outliers out of a possible 380 (20 critical monitors across 19 VISNs). Four VISNs (6, 7, 12, and 21) had no outliers. VISN 20 had the highest number of outliers (10) followed by VISNs 22 and 16 (7 outliers each).

Site Performance

Tables 16 - 42 report site-specific data for FY 2004. Identification of site outliers follows the same procedures and formatting as the VISN outliers described above.

Tables 43a, 43b and 44 provide summaries of the outlier status of each of the 34 sites for FY 2004. There were a total of 116 outliers out of a possible 680 (20 critical monitors across 34 sites). Five sites (14.7%) had no critical monitor outliers. Fifteen of the 34 sites (44.1%) had between one and three outliers, four (11.8%) had four outliers, five (14.7%) had either five or six outliers, and the remaining five sites (14.7%) had seven or more outliers.

Tables 45a – 45e provide site summaries of critical monitors organized by category, for FY 1997 – FY 2004. Tables 46 – 51 present each of the six special emphasis program performance measures over the same time period. Shading identifies outliers.

CHAPTER III: DCHV OUTREACH

The DCHV Program conducts community outreach to identify and establish contact with homeless veterans, targeting those veterans who are not using VA health care services or who are unaware of their eligibility for VA benefits. We have defined community outreach as any contact with a homeless veteran that takes place outside of the VA Medical Center or Vet Center (e.g., shelter, soup kitchen, on the streets, etc.). Central questions in the evaluation and monitoring of DCHV-sponsored outreach include:

- What types of veterans are seen at outreach?
- What types of veterans seen at outreach have completed an episode of DCHV treatment?
- How are those veterans seen at outreach and who have completed DCHV treatment different from those who have completed DCHV treatment and who were not contacted as a result of outreach?

Tables 52 – 61 present national summary data on veteran characteristics, clinical assessments and immediate treatment needs of veterans contacted through outreach by fiscal year, from FY 1992 - FY 2004⁷. Many of the characteristics are very similar from year to year; key findings are outlined below.

- Since July 1992, a total of 19,845 veterans were contacted in the community as a result of DCHV-sponsored outreach (Table 52).
- Many DCHV programs collaborate with other VA homeless programs, thus reducing the need to provide their own outreach services to homeless veterans. As such, the number of sites conducting their own outreach, and the number of veterans contacted as a result of this outreach, has been steadily declining. In FY1997, 2,563 veterans from 18 sites were contacted, as compared to 681 veterans from 7 sites in FY 2004 (Table 52). Eighty-six percent of all contacts in FY 2003 were conducted at three sites: Martinsburg, West Virginia; Dublin, Georgia; and Bay Pines, Florida.
- During FY 2004, 79.3% of veterans assessed at outreach were judged to have a substance abuse problem, 37.6% were felt to have a serious psychiatric illness, and 30.8% were dually diagnosed with a serious psychiatric illness and a substance abuse disorder (Table 58).
- Of the 1,910 homeless veterans contacted as a result of outreach during fiscal years 2002 and 2003, 418 (28.0%) were subsequently admitted to and discharged

⁷ Data for FY 1992 reflects activity for 3 months of the fiscal year (July 1 - September 30). In those cases where the interview was conducted at the VA medical center and the contact was not a direct result of community outreach (as defined above), monitoring data were not included in these analyses.

from the DCHV Program⁸ (Table 59).

Tables 60 and 61 provide comparisons among veterans contacted through DCHV outreach efforts and veterans completing an episode of DCHV treatment. The first column provides data on 1074 veterans contacted through outreach efforts during fiscal years 2002 and 2003 that had not been admitted to and discharged from DCHV treatment⁹. The second column contains data on 418 veterans contacted as a result of community outreach during fiscal years 2002 and 2003 who subsequently completed an episode of DCHV treatment. The last column reports data on 14,138 veterans admitted after September 30, 2001 who completed DCHV treatment, but were not referred to the DCHV program via community outreach.

Taken together, these tables show that DCHV outreach identifies an under-served homeless, seriously ill veteran population which could benefit from comprehensive, integrated rehabilitation and treatment, including a wide array of VA health care and VA benefit services. It should be noted that there might be some homeless veterans seen at outreach who are acutely ill and require inpatient psychiatric or medical care prior to receiving DCHV treatment.

⁸ The number of veterans admitted may be greater than 418. At the time this report is being written, there are likely to be occurrences where a veteran has been admitted but not yet discharged from the DCHV program and thus would not be represented in these available data.

⁹ There may be some occurrences where a veteran has been admitted and not yet discharged from DCHV treatment.

CHAPTER IV: SUMMARY

This report is the sixteenth in a series of reports evaluating the effectiveness of the Department of Veterans Affairs' Domiciliary Care for Homeless Veterans Program. Since its inception, there have been over 60,500 episodes of treatment provided. The DCHV Program currently includes 34 sites with a total of 1,833 operational beds, unchanged from FY 2002.

Monitoring data indicate that over ninety percent of veterans admitted to the DCHV Program in FY 2004 have a substance abuse diagnosis. Over the last six years there has been a steady increase in the percentage of veterans with severe psychiatric problems; in FY 2004 nearly half of veterans were diagnosed with a severe mental illness. Almost fifty-three percent of veterans spent at least one night outdoors or in a shelter in the month prior to their DCHV admission.

The average age of veterans admitted to the DCHV program has been increasing over time. During the same time period, there has been an increase in the proportion of veterans with chronic medical conditions such as hypertension, COPD, diabetes, and gastrointestinal and liver diseases, which may be related to increasing age.

The average length of stay in FY 2004 was 111.5 days. This figure has been gradually increasing since FY 1999. Almost three-quarters of veterans successfully completed the program. After discharge, more than one third had arrangements to live in an apartment, room or house, and more than fifty percent had arrangements to work in competitive employment or a VA work therapy program.

Performance as measured by 20 critical monitors was used to compare the operation of individual sites and to identify performance outliers. The performance across all DCHV sites is used as the norm for evaluating the performance of each individual site on most critical monitors. However, when evaluating outcomes, each site is compared to the median site, adjusting for baseline veteran characteristics that are significantly related to each outcome. There were a total of 116 outliers out of a possible 680 (20 critical monitors across 34 sites). Five sites (14.7%) had no critical monitor outliers. Fifteen of the 34 sites (44.1%) had between one and three outliers, four (11.8%) had four outliers, five (14.7%) had either five or six outliers, and the remaining five sites (14.7%) had seven or more outliers.

During FY 2004, 681 veterans were contacted as a result of outreach, 1,882 fewer veterans than in FY 1997. Many DCHV programs work collaboratively with other VA programs that provide outreach and services to veterans, decreasing the need for DCHV programs to conduct their own outreach. In FY1997, 18 sites provided outreach, compared to 7 sites in FY 2004. Ninety percent of all outreach contacts in FY 2004 were conducted at three sites.

Of the 1,910 homeless veterans contacted as a result of outreach during fiscal

years 2002 and 2003, 418 (28.0%) entered the DCHV program.

In conclusion, the DCHV Program has a substantial record of providing effective clinical assistance to homeless veterans with multiple medical and psychiatric comorbidities. In the years to come, it is expected that the DCHV Program will continue to improve and strengthen the residential treatment offered to veterans and develop new efforts to meet the changing clinical needs of this deserving veteran population.

COMPLETE THIS SECTION AT ADMISSION

Staff Member's Name

VA Facility Code

Date of Admission (mm,dd,yy)

How was contact with the DCHV Program initiated (select one)?

- ☐ 1. Outreach initiated by VA staff.
☐ 2. Referral initiated by shelter staff or other non-VA staff working in a program for the homeless.
☐ 3. Referral from an inpatient unit at VAMC.

- ☐ 4. Referral from a VA outpatient clinic or Vet Center.
☐ 5. Self-referred to Domiciliary.
☐ 6. Referred from the VA HCMV Program.
☐ 7. Other.

I. VETERAN DESCRIPTION

1. Veteran's Name (last name, first initial) (please print)

2. Social Security Number

3. Date of Birth (mm,dd,yy)

4. Sex

- ☐ 1. Male ☐ 2. Female

5. Ethnicity (check only one)

- ☐ 1. Hispanic, white ☐ 3. American Indian or Alaskan ☐ 5. Asian
☐ 2. Hispanic, black ☐ 4. Black, not Hispanic ☐ 6. White, not Hispanic

6. What is your current marital status (check only one)?

- ☐ 1. married ☐ 3. widowed ☐ 5. divorced
☐ 2. remarried ☐ 4. separated ☐ 6. never married

II. MILITARY HISTORY

7. Period of Service (check *longest* one)

- ☐ 1. Pre WW II (11/18-11/41) ☐ 4. Korean War (7/50-1/55) ☐ 6. Vietnam Era (8/64-4/75)
☐ 2. World War II (12/41-12/46) ☐ 5. Between Korean ☐ 7. Post-Vietnam Era (5/75-Present)
☐ 3. Pre-Korean War (1/47-6/50) and Vietnam Eras (2/55-7/64)

8. Did you ever receive hostile or friendly fire in a combat zone?

☐ 0 = No ☐ 1 = Yes

9. Were you ever a Prisoner of War?

☐ 0 = No ☐ 1 = Yes

III. LIVING SITUATION

10. During the 30 days before you were admitted to the DCHV Program, did you stay at least one night either outdoors or in a shelter for the homeless because you had nowhere else to go?

☐ 0 = No ☐ 1 = Yes

11. Where did you usually sleep during the month before you were admitted to the DCHV Program (select one)?

- ☐ 1. Shelter, outdoors or abandoned building. ☐ 4. Lived in intermittent residence with friends or family.
☐ 2. Residential program provided through VA contract. ☐ 5. Lived in own apartment, room or house.
☐ 3. Institution (hospital, halfway house, prison etc). ☐ 6. Other.

12. How long have you been homeless this episode (check only one)?

- ☐ 0. Not currently homeless ☐ 4. At least 1 year but less than 2 years
☐ 1. Less than one month ☐ 5. Two years or more
☐ 2. At least 1 month but less than 6 months ☐ 9. Unknown
☐ 3. At least 6 months but less than 1 year

13-17. Do you receive any of the following kinds of public financial support (check one box for each question)?

13. Service Connected/Psychiatry ☐ 0 = No ☐ 1 = Yes
14. Service Connected/Other ☐ 0 = No ☐ 1 = Yes
15. Receives NSC pension ☐ 0 = No ☐ 1 = Yes
16. Non-VA disability (eg SSDI) ☐ 0 = No ☐ 1 = Yes
17. Other public support (including cash and inkind services) ☐ 0 = No ☐ 1 = Yes

IV. MEDICAL HISTORY

18. Do you feel you have any serious medical problems (veteran's perception)? ☐ 0 = No ☐ 1 = Yes (61)

V. SUBSTANCE ABUSE HISTORY

19. Do you have a problem with alcohol dependency now (veteran's perception)? ☐ 0 = No ☐ 1 = Yes (62)20. Have you had a problem with alcohol dependency in the past? ☐ 0 = No ☐ 1 = Yes (63)21. Have you ever been in a residential treatment program or hospitalized for treatment of alcoholism? ☐ 0 = No ☐ 1 = Yes (64)22. Do you have a problem with drug dependency now (veteran's perception)? ☐ 0 = No ☐ 1 = Yes (65)23. Have you had a problem with drug dependency in the past? ☐ 0 = No ☐ 1 = Yes (66)24. Have you ever been in a residential treatment program or hospitalized for treatment of drug dependency? ☐ 0 = No ☐ 1 = Yes (67)

VI. PSYCHIATRIC HISTORY

25. Do you think that you have any current psychiatric or emotional problem(s) other than alcohol or drug use? ☐ 0 = No ☐ 1 = Yes (68)26. Have you ever been hospitalized for a psychiatric problem (Do not include substance abuse treatment)? ☐ 0 = No ☐ 1 = Yes (69)

VII. USE OF VA MEDICAL SERVICES

27. Have you used the VA medical system for medical and/or psychiatric care in the past 6 mos.? ☐ 0 = No ☐ 1 = Yes (70)28. Have you ever been admitted to a VA Domiciliary before? ☐ 0 = No ☐ 1 = Yes (71)

VIII. EMPLOYMENT STATUS

29. What is your *usual* employment pattern, past three years (check only one)? (72)☐ 1. full time (40 hrs/wk)☐ 4. student☐ 6. retired/disability☐ 2. part time (reg. hrs.)☐ 5. service☐ 7. unemployed☐ 3. part time (irreg. daywork)30. How many days did you work for pay in the past 30 days? ☐ ☐ (74)

31. How much money did you receive in the past thirty days (include all sources of income: work, disability payments, panhandling, plasma donations etc.)(select one)? (75)

☐ 1. no income at all☐ 3. \$50-\$99☐ 5. \$500-\$ 999☐ 2. \$1-\$49☐ 4. \$100-\$499☐ 6. more than \$1000

II. DISCHARGE STATUS

3. The veteran ended the DCHV Program because (select one): (114)
- ☐ 1. Successful completion of all components of the Program.
 - ☐ 2. Successfully completed *some* components of the Program.
 - ☐ 3. Veteran was asked to leave because of failure to comply with Program requirements.
 - ☐ 4. Veteran transferred to another institutional treatment program.
 - ☐ 5. Veteran left the Program by his/her own decision, without medical advice.
 - ☐ 6. Veteran was incarcerated.
 - ☐ 7. Other.
4. Select the *one best* choice that describes the veteran's overall participation in the DCHV Program. (115)
- ☐ 1. Did not participate actively.
 - ☐ 2. *Severe psychiatric problems* impeded participation.
 - ☐ 3. *Substance abuse* behavior impeded useful participation.
 - ☐ 4. *Severe medical problems* (including Organic Brain Syndrome) impeded ability to participate.
 - ☐ 5. Wanted change and expressed need for help but undermined his/her own and others' efforts to work with him/her.
 - ☐ 6. Wanted help and made use of the Program.
 - ☐ 7. Wanted help and made optimal use of the Program.
 - ☐ 8. Other.
5. Veteran's living situation after discharge will be (select one): (116)
- ☐ 0. No available residence other than homeless shelters, outdoors, etc.
 - ☐ 1. Halfway house/transitional living program.
 - ☐ 2. Institution (hospital, prison or nursing home).
 - ☐ 3. Own apartment or room.
 - ☐ 4. Apartment, room or house of friend or family member.
 - ☐ 5. Veteran left Program without giving indication of living arrangement.
 - ☐ 6. Another Domiciliary Program (other than this DCHV Program).
 - ☐ 7. Other.
6. Veteran's arrangements for employment after discharge will be (select one): (117)
- ☐ 0. Disabled or retired.
 - ☐ 1. Unemployed.
 - ☐ 2. Part-time or temporary employment.
 - ☐ 3. Full-time employment.
 - ☐ 4. In vocational training, or unpaid volunteer.
 - ☐ 5. VA's IWT or CWT.
 - ☐ 6. Student.
 - ☐ 7. Other.
 - ☐ 9. Unknown.

Domiciliary Care for Homeless Veterans OUTREACH FORM

Page 4 of 4

VIII. INTERVIEWER OBSERVATIONS

35. Does this veteran need psychiatric or substance abuse treatment at this time?	<input type="checkbox"/> 0 = No <input type="checkbox"/> 1 = Yes	(129)
36. Does this veteran need medical treatment at this time?	<input type="checkbox"/> 0 = No <input type="checkbox"/> 1 = Yes	(130)
37 - 45. Which of the following psychiatric diagnoses apply to this veteran (check one box for each question)?		
37. Alcohol Abuse/Dependency	<input type="checkbox"/> 0 = No <input type="checkbox"/> 1 = Yes	(131)
38. Drug Abuse/Dependency	<input type="checkbox"/> 0 = No <input type="checkbox"/> 1 = Yes	(132)
39. Schizophrenia	<input type="checkbox"/> 0 = No <input type="checkbox"/> 1 = Yes	(133)
40. Other Psychotic Disorder	<input type="checkbox"/> 0 = No <input type="checkbox"/> 1 = Yes	(134)
41. Mood Disorder	<input type="checkbox"/> 0 = No <input type="checkbox"/> 1 = Yes	(135)
42. Personality Disorder (DSM-III-R, Axis 2)	<input type="checkbox"/> 0 = No <input type="checkbox"/> 1 = Yes	(136)
43. PTSD from Combat	<input type="checkbox"/> 0 = No <input type="checkbox"/> 1 = Yes	(137)
44. Adjustment Disorder	<input type="checkbox"/> 0 = No <input type="checkbox"/> 1 = Yes	(138)
45. Other Psychiatric Disorder	<input type="checkbox"/> 0 = No <input type="checkbox"/> 1 = Yes	(139)
46. Where did this interview take place (check only one)?		
<input type="checkbox"/> 1. Shelter or temporary housing for homeless	<input type="checkbox"/> 3. Soup Kitchen	<input type="checkbox"/> 6 ¹ . At special program for homeless (specify _____)
<input type="checkbox"/> 2. Street, Park, Outdoors	<input type="checkbox"/> 4. VAMC	
	<input type="checkbox"/> 5. Vet Center	<input type="checkbox"/> 7. Other
Office use only DO NOT CODE		<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> (143)
47. How was contact with this program initiated (check only one)?		
<input type="checkbox"/> 1. Outreach initiated by VA staff	<input type="checkbox"/> 5. Veteran came to Vet Center	(144)
<input type="checkbox"/> 2. Referred by shelter staff or other non-VA staff working in a program for the homeless	<input type="checkbox"/> 6. Self-referred	
<input type="checkbox"/> 3. Referral from VAMC inpatient unit	<input type="checkbox"/> 7 ¹ . Through VA presence at special program for homeless (specify _____)	
<input type="checkbox"/> 4. Referral from VAMC outpatient unit	<input type="checkbox"/> 8. Other	
Office use only DO NOT CODE		<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> (147)
48. Veteran response to contact (check only one).		
<input type="checkbox"/> 1. Would not talk to VA staff	<input type="checkbox"/> 4. Is interested in full range of VA services for the homeless	(148)
<input type="checkbox"/> 2. Talked; not interested in any services	<input type="checkbox"/> 5. Other	
<input type="checkbox"/> 3. Only interested in basic services		
49-60. What are your immediate plans for referral or treatment of the veteran at this time (check one box for each question)?		
49. Basic services (food, shelter, clothing and financial assistance)	<input type="checkbox"/> 0 = No <input type="checkbox"/> 1 = Yes	(149)
50. VA medical services	<input type="checkbox"/> 0 = No <input type="checkbox"/> 1 = Yes	(150)
51. Non-VA medical services	<input type="checkbox"/> 0 = No <input type="checkbox"/> 1 = Yes	(151)
52. VA psychiatric or substance abuse services	<input type="checkbox"/> 0 = No <input type="checkbox"/> 1 = Yes	(152)
53. Non-VA psychiatric or substance abuse services	<input type="checkbox"/> 0 = No <input type="checkbox"/> 1 = Yes	(153)
54. VA pension or disability application	<input type="checkbox"/> 0 = No <input type="checkbox"/> 1 = Yes	(154)
55. Contract housing through HCMI Program	<input type="checkbox"/> 0 = No <input type="checkbox"/> 1 = Yes	(155)
56. VA Domiciliary Care Program	<input type="checkbox"/> 0 = No <input type="checkbox"/> 1 = Yes	(156)
57. Upgrading of military discharge	<input type="checkbox"/> 0 = No <input type="checkbox"/> 1 = Yes	(157)
58. Legal assistance	<input type="checkbox"/> 0 = No <input type="checkbox"/> 1 = Yes	(158)
59. Social vocational assistance	<input type="checkbox"/> 0 = No <input type="checkbox"/> 1 = Yes	(159)
60. Other	<input type="checkbox"/> 0 = No <input type="checkbox"/> 1 = Yes	(160)
Y		(161)

¹Do not use this category unless the specific program has been officially identified a special program for the homeless by VA's Northeast Program Evaluation Center.

†Outcomes have been adjusted for various veteran characteristics. Selection of these characteristics differs depending on the outcome measures, but include age, ethnicity, homelessness, receipt of disability benefits, income, employment, utilization of health care services, clinical psychiatric diagnoses and number of medical problems.

††Includes those veterans living outdoors or in a shelter as well as those who left the program without giving an indication of their living arrangements.

†††Includes those veterans who were unemployed as well as those who left the program without giving an indication of their arrangements for employment.

† Outcomes have been adjusted for various veteran characteristics. Selections of these characteristics differ depending on the outcome measures, but include age, ethnicity, homelessness, receipt of disability benefits, income, employment, utilization of health care services, clinical psychiatric diagnoses and number of medical problems.

†† Includes those veterans living outdoors or in a shelter as well as those who left the program without giving an indication of their living arrangements.

††† Includes those veterans who were unemployed as well as those who left the program without giving an indication of their arrangements for employment.
